Response to Office Action of 01/11/2007

Docket No. 1005.6  
Customer No. 53953

### **Amendments to the Claims**

The following listing of claims will replace all prior versions, and listings, of claims in the application.

1. (Previously presented) A method performed by a computer system, comprising:  
storing a version of a paper, the version being displayable on a display device as a likeness  
of the paper;

at a first location within the version, detecting a reference to a second location, wherein the  
detected reference is at least one of the following, other than a computer network address: an  
alphanumeric character; a symbol; a term; and a phrase;

in response to the detected reference, embedding a hyperlink within the detected reference;  
and

while the first location is displayed on the display device, highlighting the first location to  
indicate the hyperlink as being selectable by a user to cause an operation associated with the  
second location.

2. (Previously presented) The method of Claim 1 wherein the embedding comprises:  
embedding the hyperlink within the detected reference, wherein the second location is a  
different location within the version, and wherein the operation includes displaying the different  
location on the display device in response to a selection of the first location by the user.

3. (Cancelled).

4. (Previously presented) The method of Claim 1 wherein the embedding comprises:  
embedding the hyperlink within the detected reference, wherein the second location is a  
document external to the paper, and wherein the operation includes displaying the document on  
the display device in response to a selection of the first location by the user.

Serial No.: 09/690,366  
Response to Office Action of 01/11/2007

Docket No. 1005.6  
Customer No. 53953

5. (Previously presented) The method of Claim 1 wherein the embedding comprises: embedding the hyperlink within the detected reference, wherein the second location is a website external to the paper, and wherein the operation includes displaying the website on the display device in response to a selection of the first location by the user.

6. (Previously presented) A system, comprising:

a computing device for:

storing a version of a paper, the version being displayable on a display device as a likeness of the paper;

at a first location within the version, detecting a reference to a second location, wherein the detected reference is at least one of the following, other than a computer network address: an alphanumeric character; a symbol; a term; and a phrase;

in response to the detected reference, embedding a hyperlink within the detected reference; and

while the first location is displayed on the display device, highlighting the first location to indicate the hyperlink as being selectable by a user to cause an operation associated with the second location.

7. (Previously presented) The system of Claim 6 wherein the second location is a different location within the version, and wherein the operation includes displaying the different location on the display device in response to a selection of the first location by the user.

8. (Cancelled).

9. (Previously presented) The system of Claim 6 wherein the second location is a document external to the paper, and wherein the operation includes displaying the document on the display device in response to a selection of the first location by the user.

Docket No. 1005.6  
Customer No. 53953

10. (Previously presented) The system of Claim 6 wherein the second location is a website external to the paper, and wherein the operation includes displaying the website on the display device in response to a selection of the first location by the user.

11. (Previously presented) A computer program product, comprising:  
a computer program processable by a computer system for causing the computer system to:  
store a version of a paper, the version being displayable on a display device as a likeness of the paper;  
at a first location within the version, detect a reference to a second location, wherein the detected reference is at least one of the following, other than a computer network address: an alphanumeric character; a symbol; a term; and a phrase;  
in response to the detected reference, embed a hyperlink within the detected reference; and  
while the first location is displayed on the display device, highlight the first location to indicate the hyperlink as being selectable by a user to cause an operation associated with the second location; and  
apparatus from which the computer program is accessible by the computer system.

12. (Previously presented) The computer program product of Claim 11 wherein the second location is a different location within the version, and wherein the operation includes displaying the different location on the display device in response to a selection of the first location by the user.

13. (Cancelled).

14. (Previously presented) The computer program product of Claim 11 wherein the second location is a document external to the paper, and wherein the operation includes displaying the document on the display device in response to a selection of the first location by the user.

15. (Previously presented) The computer program product of Claim 11 wherein the second location is a website external to the paper, and wherein the operation includes displaying the website on the display device in response to a selection of the first location by the user.

Docket No. 1005.6  
Customer No. 53953

16. (Previously presented) The method of Claim 2 wherein the embedding comprises: embedding the hyperlink within the detected reference, wherein the second location is an advertisement within the version.

17. (Previously presented) The method of Claim 16 wherein the embedding comprises: embedding the hyperlink within the detected reference, wherein the reference specifies an address of a website associated with the advertisement.

18. (Previously presented) The method of Claim 1 wherein the embedding comprises: embedding the hyperlink within the detected reference, wherein the second location is a file external to the paper, wherein the file includes visual image information, and wherein the operation includes displaying a visual image on the display device in response to the visual image information and a selection of the first location by the user.

19. (Previously presented) A method performed by a computer system, comprising: storing a version of a paper, the version being displayable on a display device as a likeness of the paper;

at a first location within the version, detecting a reference to a second location, wherein the detected reference is at least one of the following, other than a computer network address: an alphanumeric character; a symbol; a term; and a phrase;

in response to the detected reference, embedding a hyperlink within the detected reference, wherein the second location is a file external to the paper, and wherein the file includes audio signal information; and

while the first location is displayed on the display device, highlighting the first location to indicate the hyperlink as being selectable by a user to cause an operation associated with the second location, wherein the operation includes outputting audio signals in response to the audio signal information and a selection of the first location by the user.

20. (Previously presented) A method performed by a computer system, comprising:  
storing a version of a paper, the version being displayable on a display device as a likeness  
of the paper;

at a first location within the version, detecting a reference to a second location, wherein the  
detected reference is at least one of the following, other than a computer network address: an  
alphanumeric character; a symbol; a term; and a phrase;

in response to the detected reference, embedding a hyperlink within the detected reference,  
wherein the second location is a script; and

while the first location is displayed on the display device, highlighting the first location to  
indicate the hyperlink as being selectable by a user to cause an operation associated with the  
second location, wherein the operation includes executing the script in response to a selection of  
the first location by the user.

21. (Previously presented) The system of Claim 7 wherein the second location is an  
advertisement within the version.

22. (Previously presented) The system of Claim 21 wherein the reference specifies an  
address of a website associated with the advertisement.

23. (Previously presented) The system of Claim 6 wherein the second location is a file  
external to the paper, wherein the file includes visual image information, and wherein the  
operation includes displaying a visual image on the display device in response to the visual image  
information and a selection of the first location by the user.

24. (Previously presented) A system, comprising:  
a computing device for:

storing a version of a paper, the version being displayable on a display device as a likeness of the paper;

at a first location within the version, detecting a reference to a second location, wherein the detected reference is at least one of the following, other than a computer network address: an alphanumeric character; a symbol; a term; and a phrase;

in response to the detected reference, embedding a hyperlink within the detected reference, wherein the second location is a file external to the paper, and wherein the file includes audio signal information; and

while the first location is displayed on the display device, highlighting the first location to indicate the hyperlink as being selectable by a user to cause an operation associated with the second location, wherein the operation includes outputting audio signals in response to the audio signal information and a selection of the first location by the user.

25. (Previously presented) A system, comprising:

a computing device for:

storing a version of a paper, the version being displayable on a display device as a likeness of the paper;

at a first location within the version, detecting a reference to a second location, wherein the detected reference is at least one of the following, other than a computer network address: an alphanumeric character; a symbol; a term; and a phrase;

in response to the detected reference, embedding a hyperlink within the detected reference, wherein the second location is a script; and

while the first location is displayed on the display device, highlighting the first location to indicate the hyperlink as being selectable by a user to cause an operation associated with the second location, wherein the operation includes executing the script in response to a selection of the first location by the user.

26. (Previously presented) The computer program product of Claim 12 wherein the second location is an advertisement within the version.

27. (Previously presented) The computer program product of Claim 26 wherein the reference specifies an address of a website associated with the advertisement.

28. (Previously presented) The computer program product of Claim 11 wherein the second location is a file external to the paper, wherein the file includes visual image information, and wherein the operation includes displaying a visual image on the display device in response to the visual image information and a selection of the first location by the user.

29. (Previously presented) A computer program product, comprising:  
a computer program processable by a computer system for causing the computer system to:  
store a version of a paper, the version being displayable on a display device as a likeness of  
the paper;  
at a first location within the version, detect a reference to a second location, wherein the  
detected reference is at least one of the following, other than a computer network  
address: an alphanumeric character; a symbol; a term; and a phrase;  
in response to the detected reference, embed a hyperlink within the detected reference,  
wherein the second location is a file external to the paper, and wherein the file  
includes audio signal information; and  
while the first location is displayed on the display device, highlight the first location to  
indicate the hyperlink as being selectable by a user to cause an operation associated  
with the second location, wherein the operation includes outputting audio signals in  
response to the audio signal information and a selection of the first location by the  
user; and  
apparatus from which the computer program is accessible by the computer system.

30. (Previously presented) A computer program product, comprising:  
a computer program processable by a computer system for causing the computer system to:  
store a version of a paper, the version being displayable on a display device as a likeness of  
the paper;  
at a first location within the version, detect a reference to a second location, wherein the  
detected reference is at least one of the following, other than a computer network  
address: an alphanumeric character; a symbol; a term; and a phrase;  
in response to the detected reference, embed a hyperlink within the detected reference,  
wherein the second location is a script; and  
while the first location is displayed on the display device, highlight the first location to  
indicate the hyperlink as being selectable by a user to cause an operation associated  
with the second location, wherein the operation includes executing the script in  
response to a selection of the first location by the user; and  
apparatus from which the computer program is accessible by the computer system.
